City planners are creating a neighborhood map on a coordinate grid. The table shows the locations of the neighborhood library and school on a coordinate grid.

Neighborhood Planning

Building	Location
Library	$(-4, -6)$
School	$(5, -6)$

In this coordinate grid, the distance between each gridline represents 1 mile. What is the distance between the library and the school on the grid?

You can use the coordinate grid to help you find the answer by plotting the two points. Be sure to place your final answer in the box.

Enter your answer in the box.
